Safari Version 6.0.2

1. Click the settings button on the Safari tool bar
2. Click History

3. Review the visited sites

For all browsers, more detailed information can be found on how to find deleted history on your computer or mac. Please remember that cell phones, tablets and other internet connected devices also store history. Use your favorite search engine and use a phrase similar to “how to view or restore deleted internet history on my computer” and review your results.
